Waldale

MVLS utilizes 3M materials exclusively for all of our license plate programs be they short or large run. Our plates utilize the 3M Ensure Mark\* vertically through the center of the plate and a DST on the right quarter.

## U. S. Virgin Islands

MVLS has produced license plates and validation stickers for the USVI since 1986. The USVI has approximately 22 specialty plates not including general issue personalized plates. MVLS has helped these local non-profits in raising over \$500,000 in the past 11 years. MVLS prides itself on being very involved with their clients in the USVI and we visit these customers at least twice each year.

## British Virgin Islands

MVLS has produced license plates for the BVI for over 8 years. Graphic plates are new to the BVI. A new graphic replacement for passenger plates first begun in 2010 is currently in process. Graphic plates are also now in use for various Livery, Taxi, and personalized plates in the BVI.

\*plates produced prior to 2005 did not have the 3M Ensure Mark

## St. Lucia

MVLS previously produced plates for St. Lucia. These plates were primarily for the Taxi Association in St. Lucia as all other plates were of the British style/format.

## St. Maarten, N.A.

MVLS produced plates for St. Maarten, N. A., for over 10 years. In 2008, we relinquished the contract to a Chinese company who provided less expensive plates but also an inferior product. The plate design faded quickly in the first year and was replaced the following year. The experience was the same again in 2009.

We continue to work with our local agent producing validation stickers and small plate orders for surrounding islands.

## St. Eustatius, N.A.

MVLS has produced license plates for St. Eustatius since 1999. In 2007, a new plate was introduced and produced using Chinese sheeting. In 2010, MVLS once again received the contract for St. Eustatius plates. We also produce the validation stickers for all of their plates.

## Antigua & Barbuda

MVLS produced windshield validation stickers for the Transportation Board for all vehicles from 1999 through 2001. New license plates were designed and a quotation was presented in 2002. They continue to have their plates made locally at highly inflated prices.

## Haiti

2006, 2007, 2009. MVLS produced license plates for the Haiti Police, all 5 regions of the country, in 2006. In 2007 and 2009 additional plates were ordered. Each region is designated by a particular color with its own numbering system.

## Saba, N.A.

MVLS has produced the license plates for Saba, N. A. (now called Saba), since 1999. The most recent re-issue of Saba plates occurred in January 2011 and were produced by MVLS.

# ADDITIONAL MVLS PROJECTS

**American Samoa** - Late in 2010, MVLS was contacted to design and produce new license plates for American Samoa. The plates issued in 2010 were produced using Chinese sheeting in Singapor. The paint on these plates did not even last one year. The "sticker well" dies were installed in the press backwards so instead of a raised area on the plate the "sticker wells" were debossed and had to be painted by hand. The dies used for the numbers in the first half of the year were motorcycle sized dies on a passenger size plate. The second half of the year had standard passenger size number dies. In January 2011, MVLS produced the first graphic design for American Samoa. Those plates are currently being phased in this year. The Government is very pleased with the work of MVLS.

**Province of Alberta** - In 1997, MVLS, working with Hi-Signs Manufacturing, Ltd., produced prototype license plates at the request of the Government in anticipation of the Centennial of the Province. This project did not move forward and the designs are still the property of MVLS.

**Canadian Olympic Association** - In 1986, MVLS became a sponsor of the 1988 Calgary Olympic Games in Calgary Alberta Canada. We produced both legal and souvenir plates as an Olympic sponsor. Our association with the Canadian Olympic Association expired after the Atlanta 1996 Olympic Games.

**Virgin Islands Olympic Committee (USVI)** - Since 1996, we have designed and produced a new legal Olympic license plate every two years for both the winter and summer Games. We have donated nearly \$50,000 to the USVI Olympic Committee since 1996. The new legal license plate commemorating the London 2012 Games went on sale earlier this year in the USVI.

**Northwest Territories and Nunavut** - MVLS designed prototype plates for Historic Vehicles in 2002 based on the 1941 NWT license plate. Ultimately the design did not move forward. In 2008, MVLS was contacted to produce sample prototype plates for Nunavut. Several designs were submitted. Designs are still pending.

**Presidential Inaugurals** - MVLS has produced Inaugural license plates for the 2001, 2005 and 2009 U.S. Presidential Inaugurations.

**U. S. Forces Korea** - 2002 was the first year MVLS produced plates for the U. S. Forces in Korea. Recently we received an inquiry about a design change. We are awaiting word on what that might be. Plates are currently still in use.

# ADDITIONAL MVLS PROJECTS

---

**U. S. Government** - Secret Service; duplicate plates produced for vehicles used as decoys for Vice President Richard Cheney. No further information can be provided.

**U. S. Army** - MVLS has produced plates for the U. S. Army since 2007 through 2011 (current). These plates are produced for an Army base in Pennsylvania on an as needed basis.

**Car Clubs** - MVLS produces a wide array of custom designed souvenir plates for various clubs and organisations such as Route 66 Fun Run, ALPCA, etc.

**Marshall Islands** - In 2011 MVLS was contacted to produce a reissue of plates in the Marshall Islands. A contract is expected early in the second quarter of 2011. Prototypes have been produced and shipped.

**State of Oregon** - In 1996 MVLS received the contract for the Public Utilities Commission 1996 (PUC plate order).

**Nato Summit** - Washington DC 50th Anniversary - In 1999 MVLS produced the Presidential License Plates (under President Clinton) for the Nato Summit VIP detail for all countries attending this Summit in Washington D. C.

**State of Colorado** - Pawnee and Clifton Fire Districts - In 2010 MVLS designed license plates for the Pawnee and Clifton Fire Districts in the State of Colorado. These plates are produced in Colorado by Juniper Valley Products using 3M reflective material.

**Republic of Palau** - Plates were produced in 2000 for the Sonsorol State in Palau and for the Ngchesar State in 2004. We served as the sub-contractor on this project.
